SMART™

SMART Board™ 6052i interactive display

The SMART Board 6052i interactive display is a touch-enabled LCD display designed to give you access to digital materials in your meetings and make interacting with your notes a more intuitive and engaging experience. The 6052i combines a professional-grade LCD display with SMART's DViT™ (Digital Vision Touch) technology to give you a large, high-quality display that you can easily operate using your finger or the pencil tool. This widescreen, projector-free system also supports HD and eliminates shadows, improving both the visibility and impact of your notes and visuals.

Improve efficiency

With the 6052i, it's easy to collaborate, build consensus and compile information. You can access digital files, applications and resources using the large, interactive display. The 6052i enables you to open and write in Microsoft® Word and PowerPoint®, and on other commonly used applications, with digital ink. And you can save all your notes in one file, complete with digital markups. You can e-mail your files from the interactive display or save them to a USB drive to share later.

Experience touch

The 6052i features SMART's award-winning DViT technology, enabling you to write notes or interact with applications without special tools. You can use your finger as a mouse, and use touch gestures to scroll through documents and zoom in on objects. The touch experience is intuitive and precise, so the learning curve is minimal. And you can use either your finger or the pencil tool to interact with information – the display will recognize both. There's no need to access other tools, buttons or on-screen menus.

Install and maintain easily

This interactive display features a one-piece, integrated design, so you can install it quickly and easily – right out of the box. And because the 6052i doesn't require projector bulbs or filters, you'll spend less time managing and supporting it.

Works well with others

You can seamlessly integrate the 6052i with other meeting room technology:

- DVD and Blu-ray™ players
- Video conferencing systems
- SMART Hub collaboration appliance
- SMART Bridgit™ conferencing software
- SMART Mobile Stand for interactive displays

1 Widescreen SMART Board interactive display – Enjoy the touch-sensitive interactive display in a 16:9 aspect ratio.

2 High-definition, professional-grade LCD panel – Experience high-definition (1080p) resolution with the 6052i. It is capable of handing all-day, every day use.

Key features

Simple installation
Install the 6052i right out of the box. With an integrated one-piece design, the 6052i is easy and cost-effective to install. Simply mount the interactive display and connect it to a computer or SMART Hub collaboration appliance and the 6052i is ready to use.

Touch system
Write and erase digital ink using either the pencil tool or your finger. You can also use your finger to perform mouse functions.

Touch gestures
Navigate through applications using your fingers to perform common touch gestures, such as scaling, scrolling, transitioning between pages, right clicking, rotating and erasing. Enabled by DViT technology, touch gestures are supported in SMART Meeting Pro™ Premium software and all Microsoft Windows® 7 applications.

SMART Meeting Pro Premium software
Collaborate with ease using SMART Meeting Pro Premium software, which comes with the 6052i. This software enables you to open applications and write in digital ink in Microsoft Office documents and other applications. You can save your marked-up pages, diagrams and whiteboard notes into a single PPT file or PDF to e-mail to your team or save to a USB drive.

Space-saving system
Incorporate the 6052i into most meeting room environments. The interactive display features a space-saving design that creates a small footprint.

Low total cost of ownership
Minimize your usage costs and eliminate the need for regular maintenance. The 6052i doesn't require projector bulbs or filters, and has a long life, even with constant use.

Color option
Enjoy the 6052i in either a black or white finish.

Warranty
Get a two-year warranty on the SMART Board 6052i interactive display.
