

## Enter a new era of language learning with Sanako Speak!

### Introduction

A language lab inspires students to actively participate in language learning exercises and encourages them to practise much more than is typically possible in a traditional classroom environment.

With the new Sanako Speak! software, many of the benefits of a language lab are available wherever a computer and an internet connection exist.

### Activity based learning approach

The activity-based learning approach of Sanako Speak! has been developed together with subject matter experts and in real-life settings to ensure user friendliness and a feature set that reflects the true needs of language teaching and learning.

Sanako Speak! offers teachers a multitude of different activities that can be easily assigned to students as practise activities or assessable homework exercises. These activities are designed to develop the core skills of language teaching and learning: especially listening and speaking.

### Flexibility

Teachers using Sanako Speak! are not tied to prepared content within the system. Content supplied by publishers and other media producers can be easily integrated.

Sanako Speak! gives teachers the choice and flexibility to use whatever teaching material they want, whenever they want and to deliver the type of activity they want.

### Cloud Technology

Sanako Speak! uses cloud computing with little need for software installations in the computer lab or software upgrades. All the tools and software teachers and students need to complete or build exercises are delivered from the cloud after logging in. This offers the user institution scalability, accessibility and agility.

Cloud computing also provides seamless access from anywhere in the world. Students with access to a computer with an internet connection and headphones and a microphone can simply and quickly deploy Sanako Speak! wherever they are.

## Speak! Delivery

Institution specific Sanako Speak! accounts will be created for each customer. The access and login details of a customer will be delivered to the institution's appointed Speak! administrator via email.

The administrator will then create and share Sanako Speak! user accounts to the other Speak! users in the institution, namely the teachers and the students. Once user accounts have been created teachers and students can enter an inspiring world of language learning with Sanako Speak!

Read more about using Sanako Speak! in the Getting started guide on the Speak! download site.

## How to order

The following information needs to be attached to orders for account creation purposes:

- Sanako Speak! domain name requested by customer. Domains are named as follows:  
<http://requestedname.sanakospeak.com>
- E-mail address of the institution's Sanako Speak! administrator
- Number of users and length of subscription. Speak! order codes are as follows:
  - 8000001 Sanako Speak! single user, one year subscription
  - 8000002 Sanako Speak! single user, two year subscription
  - 8000003 Sanako Speak! single user, three year subscription

After an order is received with the above information, a Sanako Speak! account will be created for the institution. A link to the institution's specific Sanako Speak! domain and the administrator login details will be delivered to the specified administrator.

Each Sanako Speak! account has storage capacity for saving exercises and student work. The amount of storage capacity depends on the number of licensed users. The default storage capacity is 100 MB per user. I.e. the total amount of free storage capacity for a 250 user Sanako Speak! account would be:  $250 \times 100 \text{ MB} = 25 \text{ GB}$ .

## Availability

Sanako Speak! client software, product documentation and information on the recommended computer setup is available on the Sanako Speak! download site.
